PROFILE

As a Full Stack Developer with expertise in HTML, CSS, JavaScript, and Node.js, I specialize in building responsive and user-centered UIs using frameworks like React, Vue.js, and Next.js. I bring a strong understanding of software development principles, agile methodologies, and cross-functional collaboration. Experienced in both frontend and backend development, I am adept at working with databases like MySQL and MongoDB and creating efficient server-side logic. Passionate about delivering high-quality, scalable solutions, I am committed to maintaining code quality and ensuring seamless user experiences.
